SUMMARY

Results-driven and detail-oriented Data Analyst with 2 years of experience at CreditInfo Credit Reference Bureau. Proficient in extracting, cleaning, and analysing data to provide actionable insights for clients. Skilled in Python, Excel, Power BI, and logistic regression for scorecard creation. Experienced in designing lending strategies for financial institutions and creating compelling data visualizations and presentations. Adept at translating complex data into meaningful business solutions.

SKILLS

- Data Extraction & Cleaning
- Data Analysis & Visualization
- Python Programming
- R Programming
- Excel Advanced Functions
- Power BI and Tableau Dashboard Creation
- Logistic Regression & Scorecard Development
- Lending Strategy Design
- PowerPoint Presentation Design
- Client Communication & Reporting
- DevOps

Projects

Energy production forecasting using Time series Analysis -

Food recommender system was specifically developed for diabetic patients to recommend food with low glycemic index and specific amount per meal. I developed the system using python and machine learning algorithms such as XGboost, Random Forest, Hierarchical clustering and deployed using streamlit.

Insolvency Risk Analysis- [Link](#)

In this project, the main aim was to cluster different factors that could lead to a company/ individual being declared bankrupt or not, by determining their financial positions such as(stable,potential and/or at risk).The clustering methods that were used are KMeans clustering and Hierarchical Clustering. The machine learning algorithm that was used was Random Forest and the language used was python.

R Programming Sub-Projects-[Link](#)

The project was about clustering customer groups and behavior of Kira Plastinina which is a Russian brand that is sold through a defunct chain of retail stores in Russia, Ukraine, Kazakhstan, Belarus, China, Philippines, and Armenia. To be used by the brand's Sales and Marketing team. I used R programming and Hierarchical and KMeans clustering.

Tableau Visualizations -[Link](#)

The link above directs you to the visualizations that I have done using tableau.

EXPERIENCE

Decision Analytics | Creditinfo Credit Reference Bureau Kenya Limited December 2022 - Up to date | Westlands, Nairobi Kenya

Responsibilities

- Extracting and processing large datasets from databases to fulfill client requests, ensuring accuracy and timeliness.
- Cleaning and analyzing data using Python and Excel, identifying trends and patterns to support decision-making.
- Creating interactive dashboards and reports using Power BI, enabling clients to visualize key metrics and insights.
- Developing scorecards using logistic regression models to assess creditworthiness and risk.
- Designed lending strategies for financial institutions, leveraging data insights to improve financial inclusion and lending outcomes.
- Preparing and delivering PowerPoint presentations to stakeholders, summarizing findings and recommendations.
- Collaborating with cross-functional teams to optimize data processes and improve reporting efficiency.
-

Achievements

- Development of a business blended strategy solution that combines the scores of both the directors and the company to determine the credit worthiness of the business.

Data Science | Riset Software & Systems

July 2022 - October 2022 | View Park Towers, Nairobi Kenya

Responsibilities

- Assisting customers to collect and record their stock in CSV files
- Cleaning the collected data by removing duplicates and missing entries
- Uploading the cleaned data to their ERP systems
- Providing support to the customers in event they have issues with operating their ERP systems
- Training new customers on how to use ERP system
- Maintaining the databases
- Analyzing company's data for trends and specific patterns and find answers to specific questions
- Preparing reports for executive, developers, technicians and marketing teams.

Achievements

- I was able to enhance the data collection process
- I was able to successfully train the new clients to use the ERP system and also helped the existing customers to troubleshoot the problems they were encountering while using the system.
- I helped the sales team to understand why only few new clients were interested in buying the system even after doing a lot of advertising and demonstrations by doing the market analysis which showed how the company was competing with other companies that were selling the similar systems.
- I worked closely with the development team during the initial stages of developing an automated hotel management system where I was giving them ideas on which kind of data to use and the features to be included during the development.

Responsibilities

- Instructing students on web development and computer packages.
- Developing and maintaining Websites

Achievements

- I introduced a new teaching strategy which was very beneficial to students.

Technical Skills

- **Programming Languages:** Python (Pandas, NumPy, Scikit-learn), SQL
- **Data Visualization Tools:** Power BI, Tableau, Excel Charts
- **Data Analysis Tools:** Excel (Advanced Functions, Pivot Tables), Jupyter Notebook
- **Machine Learning:** Logistic Regression, Predictive Modelling
- **Presentation Tools:** Microsoft PowerPoint
- **Database Management:** SQL Server

EDUCATION

Moringa School DevOps Engineering	June. 2024
March 2024-June 2024	
Moringa School Data Science	July. 2022
January 2022-July 2022	Dec. 2021
Murang’a University Of Technology Bachelor of Science in Software Engineering	
August 2017-December 2021.	
• Second class upper
